WORK EXPERIENCE

FEB2021 - PRESENT (FT)

To The New
Software Developer

I have worked on fin-tech projects like PWC and rocketfuel Blockchain. My main area of work was to create new features for the web applications which includes creating new API's, enhancing UI and performance.

JAN 2020 - APR 2020 (PT)

CodingBlocks
Teaching Assistant

I used to tackle questions related to the understudies joined up with Machine Learning or DataScience batch.

NOV 2019 - MAR 2020 (PT)

Google Code-In
Mentor@Tensorflow

The position involved mentoring the school going students (13-17) years of age to introduce them to open source and giving them the opportunity to become part of the open source community by working on real-world software projects, supported by an international community to help them learn and succeed
