EDUCATION

BVCOE
B.Tech (Information Technology)
Aug 2017 - Aug 2021

LINKS

Portfolio:// **chiraggandhi**
LinkedIn:// **chirag-gandhi**
Github:// **chiraggandhi123**

SKILLS

AI / LLM:
Claude, Gemini & OpenAI APIs, Multi-Agent Systems, Agent Orchestration, Structured Outputs, LLM-as-Judge Evals, Guardrails, RAG, Vector Databases, Prompt Engineering

REALTIME & VOICE:
LiveKit (WebRTC), SSE Streaming, ElevenLabs TTS/STT, Web Speech API

AI DEV TOOLS:
Claude Code, Cursor, GitHub Copilot

LANGUAGES:
TypeScript, JavaScript, Python, SQL, HTML, CSS/SASS

FRONTEND:
React.js, Next.js, Redux, React Native, Vite, Webpack

BACKEND & APIS:
Node.js, Express, Flask, REST APIs, GraphQL, gRPC, Microservices, OAuth, JWT

CLOUD & DATABASES:
AWS (EC2, S3, RDS, Aurora, DynamoDB), PostgreSQL, MySQL, MongoDB

CI/CD & DEVOPS:
Docker, Kubernetes, GitHub Actions, Jenkins, Git

TEACHING

CODING BLOCKS
Certificate Link
Oct 2020 – Jul 2021

• Resolved **300+ student queries** in **Python, C++, Machine Learning** and **Data Science** via 1-on-1 sessions.

CERTIFICATES

AWS Certified Cloud Practitioner
AWS Cloud Foundations
Machine Learning - Coding Blocks

SUMMARY

Full-stack Lead Engineer with **5+ years** of experience shipping web products used by **200K+ users**, now building **agentic AI** and **LLM-powered** applications end to end: **multi-agent orchestration**, **real-time streaming** voice/chat UIs, **structured outputs**, **guardrails**, **LLM-as-judge evaluation** and **multi-provider LLM routing** (Claude, Gemini, OpenAI). Strong in **TypeScript, React/Next.js, Node.js, Python, AWS** and **CI/CD**.

WORK EXPERIENCE

INFOEDGE | Naukri Campus

Lead Engineer — Apr 2025 – Present

- **Agentic AI (POC):** Built a real-time **multi-agent** Group Discussion simulator where **5 LLM agent personas** share a **LiveKit (WebRTC)** voice room, **stream** replies, interrupt each other and yield when the candidate speaks; built with **TypeScript, Node.js** and **React**.
- Designed the **agent orchestration** layer: an **LLM dispatcher** returns **strict JSON** to pick the next speaker, backed by a deterministic fallback and a shared **guardrail** gate; verified with **20,000 simulated sessions** in which all **47K adversarial** decisions were blocked.
- Built a provider-agnostic **LLM layer** that routes by workload (**Gemini Flash** for high-volume streaming, **Claude** for evaluation) with automatic **fallback**, and prefetched orchestration calls during audio playback to hide their latency.
- Built the **voice pipeline**: a distinct **ElevenLabs TTS** voice per agent and server-side **speech-to-text** (about **1s** per utterance), with browser speech recognition for live captions and as a fallback.
- Built an **LLM-as-judge** evaluator that scores candidates on a 4-dimension rubric with structured output and a heuristic fallback, plus a dashboard tracking score trends across sessions.
- Automated test-case generation and documentation with **AI coding tools**, reducing developer effort by **30%**.
- Led the **React 17 to 18** migration and performance work (code-splitting, **Webpack 5**, **Partytown**), cutting interaction latency by **15%** and page load time by **40%**; introduced **TypeScript** across core modules, reducing production bugs by **30%**.
- Mentored **3+ engineers**; partnered with backend teams on **REST/GraphQL APIs** and **JWT** authentication.

Senior Software Engineer — Jun 2023 – Apr 2025

- Shipped **10+ production features** across contests, engagement and assessment platforms used by **200K+ users**.
- Led **Core Web Vitals** optimization across **10+ high-traffic pages**, improving **INP by 38%** and **CLS by 95%**.
- Set up **CI/CD pipelines** with **GitHub Actions** and **Jenkins** to automate build, lint, test and deployment.
- Recognized with a **5-Star Annual Rating**, Quarterly Individual Excellence Award and Team Collaboration Award.

Software Engineer — Mar 2022 – Jun 2023

- Built an **AI-powered resume summary system** using **LLM-based content generation**, improving resume quality scores by **20%**.
- Migrated **7+ components** to **React Native** and Flutter, and benchmarked both (React Native used up to **2.7×** more CPU).
- Implemented secure **JWT-based authentication**.

TO THE NEW | Noida, India

Software Developer — Aug 2021 – Mar 2022

- Built **3 high-traffic UIs** with **React.js, Redux** and **SASS** serving **50K+ daily active users**.
- Built APIs with **Node.js** and **Flask (Python)**, reducing average latency by **40%**.
- Reduced JavaScript bundle size by **25%** by refactoring legacy code.

AWARDS

Jun 2022	**E-yantra**	Secured **2nd Prize**
Jun 2021	National Programming Contest (Nagarro & Coding Blocks)	Ranked **6th**
Jan 2020	IDEAHACK (HackerEarth, BVP)	Secured **1st Prize**
